S-Difference is equal to the actual S-Curve ranking minus the expected S-Curve ranking.
Expected S-Curve ranking is equal to the sorted value of the average ranking value from the previous page.
Teams with a positive S-Diff were seeded below their expected S-Curve position while teams with a negative S-Diff were seeded above their expected S-Curve position.

NOTES FROM 2016 NCAA TOURNAMENT

Last year, 27 teams had an S-Curve ranking that was 5 spots or more different than their expected ranking spot, 12 teams by 8 or more spots.

Among the most under seeded teams included Wichita State (19), Gonzaga (18), and Stephen F. Austin (12). Wichita State beat Arizona in the first round, Gonzaga beat higher-seeded Seton Hall and Utah, and Stephen F. Austin upset West Virginia.

MARCH MADNESS BY THE NUMBERS

The ebbs and flows of the college basketball season leave certain impressions of players and teams engraved in our minds. While watching games during the regular season offer a look at the season at hand, I believe that taking a look back at the trends of past NCAA Tournaments also offers great insight into what could happen this season.
TOURNAMENT TRENDS - THE ROUND OF 64

The first round of the NCAA Tournament offers thirty-two games of excitement. Going back to the 2003 tournament, the higher seed is the opening round has gone 336-112 (75%) and 219-219-9 (50%) against the spread. The nineteen wins of higher-seeded teams in 2016 was the lowest number of wins by the higher seeds over the fourteen year time period going back to 2003. The drop in success has carried over to a three year stretch sub fifty percent success against the spread. Of the 18 against the spread loses by higher seeded teams in 2016, only two games were decided within two points of the spread whereas seven teams failed to cover by ten or more points. This trend of 2016 was much different than the hard luck of 2015 where five higher seeded teams missed covering the spread by less than three points.

	S/U	ATS
2011	27-5 (84%)	18-13-1 (58%)
2012	22-10 (69%)	17-14-1 (55%)
2013	23-9 (72%)	16-16-0 (50%)
2014	24-8 (75%)	13-17-2 (43%)
2015	26-6 (81%)	12-19-1 (39%)
2016	19-13 (59%)	14-18-0 (44%)
Last 10 Tournaments	238-82 (74%)	161-153-6 (51%)

The following chart groups the conferences into tiers. The six "Power Conferences" were automatically grouped into that tier. The remaining conferences were given a ranking of "High", "Mid", "Low" in each season based upon their adjusted efficiency margin average. After compiling these rankings categorizations for each season, a composite score was given with a "High" being worth 3 points, a "Mid" worth 2, and "Low" being worth 1. After sorting based upon these totals, conferences were placed based upon their pecking order.
